

Ismail Salama Abolsoud Saleh

Software Engineer | Full Stack Developer

[LinkedIn](#) [Github](#) ismailsalama526@gmail.com Phone: +20 1017645736

PROFESSIONAL SUMMARY

- Computers & Systems Engineering graduate focused on building full-stack web applications using C#, ASP.NET Core, Next.js, TypeScript, JavaScript, and Tailwind CSS.
- Experienced in designing REST APIs, database-driven systems, authentication and authorization workflows, and responsive user interfaces.
- Passionate about software engineering, cross-platform development, and continuously learning new technologies to build scalable and maintainable solutions.

EXPERIENCE

Campfit - Boston, United States. mycampfit.com

February 2026 → Present

Software Engineer: Part-time (Remote)

- Developed production features using Next.js, ASP.NET Core Web API, PostgreSQL, and Docker.
- Built responsive frontend interfaces and integrated REST APIs.
- Performed SEO, traffic analysis, and competitor research using SEMrush.
- Developed Python scraping tools for market and competitor analysis.
- Collaborated on feature gathering, requirement analysis, and product reviews.

Fleet Hotel Elgezirah

June 2025 → June 2026

Software Engineer

HUMAN RESOURCES SYSTEM

OCT 2025 → APR 2026

- Developed a comprehensive HR Management System using ASP.NET Core MVC, Entity Framework Core, and SQL Server, following a layered architecture to manage employee records, attendance, shifts, leaves, penalties, and recruitment workflows.
- Implemented role-based access control, Cookie Authentication, secure file management, and biometric attendance integration (ZKTeco devices) to support enterprise-grade workforce management and data security.
- Built advanced reporting and operational features including automated PDF generation with QuestPDF, attendance tracking, payroll-related penalties, and real-time administrative dashboards, delivering scalable and maintainable business process automation.

HOUSE KEEPING SYSTEM

JUN 2025 → OCT 2025

- Developed a housekeeping management system using ASP.NET Core MVC, Entity Framework Core, and SQL Server to manage housekeepers and daily work logs across multiple operational areas.
- Implemented session-based authentication, admin user management, and structured data workflows to support secure administration, workforce tracking, and efficient daily operations.
- Built search, filtering, and grouped reporting features to enable date-based work review, historical tracking, and better operational oversight.

CERTIFICATES

ITI Full Stack PHP 120 hours

Completed hands-on training in full-stack web development using HTML, CSS, JavaScript, PHP, Laravel, MySQL, MVC architecture, and RESTful API development.

Machine Learning Course Google Developer Students Club

Learned the fundamentals of Machine Learning using Python, NumPy, Pandas, Scikit-learn, covering data preprocessing, regression, classification, and model evaluation.

Hacking from Beginning to Advance WE Training

Studied cybersecurity fundamentals, including networking, Linux, Kali Linux, web application security, OWASP Top 10, and basic penetration testing techniques.

Artificial Intelligence WE training

Explored the fundamentals of Artificial Intelligence, including search algorithms, knowledge representation, neural networks, and introductory concepts in machine learning and deep learning.

Plus another certificates related to Node js for backend, Python, Data Structures with C and C++ workshops.

EDUCATION

Bachelor of Computer and Systems Engineering

Faculty of Engineering - Ain Shams University

Year of Graduation: 2024

Graduation Project: *cw_spaces website*

CO-WORKING SPACES WEBSITE (GRADUATION PROJECT)

NOV 2023 → JUL 2024

- Developed a full-stack co-working space management platform using React, Node.js/Express, MySQL, and Sequelize, enabling workspace discovery, room reservations, event registration, and booking management across multiple user roles.
- Implemented secure and scalable backend features including JWT authentication, role-based authorization, Stripe payment processing, Redis caching, Bull queues, Cloudinary file management, and email verification/password recovery workflows.
- Built responsive and maintainable user interfaces using Material UI, Tailwind CSS, Redux Toolkit, and RESTful APIs, following modular architecture principles to support scalability and long-term maintainability.

MILITARY STATUS

Completed Military Service 1 June 2026.

TECHNICAL SKILLS

Languages

- C#
- JavaScript
- TypeScript
- SQL
- C++ (Knowledge)
- Python (Knowledge)
- Java (Knowledge)
- PHP (Knowledge)

Frameworks & Libraries

- ASP.NET Core
- React
- Next.js
- Node.js
- Express.js

Databases

- SQL Server
- MySQL
- MongoDB (Knowledge)

Tools

- GitHub
- Postman
- Redis
- Docker
- Cloudinary

SOFT SKILLS

- Problem Solving
- Teamwork & Collaboration
- Communication Skills
- Time Management
- Adaptability & Continuous Learning
- Attention to Detail
